### EXAMINER'S AMENDMENT

1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this Examiner's Amendment was given in a telephone interview with Michele L. Connell on 31 May 2005. The application has been amended as follows:

- In Claim 5, on the last line, please delete "ration" and insert "ratio".

### *Allowable Subject Matter*

3. Applicant's arguments have been fully considered and are persuasive. The following is an Examiner's statement of reasons for allowance:

The closest prior art (Naruto et al.) teaches, at the very least, a camera that controls exposure of an image sensor according to a result of distinguishing between three conditions, wherein a preliminary first condition and a second condition are distinguished by determining whether the difference in brightness between a central portion of an image B<sub>vs</sub> and a peripheral portion of an image B<sub>va</sub> is greater or less than 2 and if the difference is less than 2, a normal front light condition is determined and if the difference is greater than 2, a back light condition is determined. Furthermore, when the normal front light condition is determined, it is further determined whether a low brightness front light condition or a high brightness front light condition exists.

However, the closest prior art does not teach or fairly suggest a camera that first distinguishes between a fourth condition including the first and second conditions, i.e., including a condition in which there is little difference in brightness between the subject and background (the first condition) and a condition in which there is much difference in brightness between the subject and the background and the subject is less bright than the background (the second condition), and a fifth condition including the first and third conditions, i.e., including a condition in which there is little difference in brightness between the subject and background (first condition), and a condition in which there is much difference in brightness between the subject and the background and the subject is brighter than the background (third condition).

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
